

MacTech Coordinator Brandon Jones

November 2016

1 Corinthians 15:58 "Therefore, my beloved brethren, be ye steadfast, unmovable, always abounding in the work of the Lord, forasmuch as ye know that your labour is not in vain in the Lord."

I have had the privilege over the last month of meeting many wonderful people, and making many new friends as we have traveled around the country. We joined the Builders at Emmanuel BC in Bogalusa, Louisiana, visited Ebenezer BC in Wiggins, Mississippi, attended mission's conferences at Hillcrest BC in Acworth, Georgia, and White Oak BC in Nancy, Kentucky, and worshiped with Parkers Mill Road BC in Somerset, Kentucky. For many of you, however, this newsletter serves as a first introduction.

We are Brandon, Amanda, Caleb (8) and Kaylee (5) Jones sent out by White Rock MBC in Center, Texas. We are brand new to the mission field and we are so excited about the work the Lord has called us to do. We have named the ministry MacTech, which as the name suggests is a new technology ministry through Macedonian Missionary Service. This ministry will allow me to do what I have been doing for the last twenty years, but to use those abilities for the Lord to help missionaries and churches with websites, social media, implementing or improving online fundraising, and seeking out or developing other new technologies that can help promote their ministries and advance the gospel of Jesus Christ.

Following a week of revival at my home church where Brant Lane was the evangelist, I began helping Macedonian with its website. Over the course of the next year the Lord began to deal with me about stepping out to help other missionaries with the same need. The Lord revealed that vision to Brant as well, and after spending a lot of time in prayer together, MacTech was launched. It is something new and out-of-the-box as far as ministries go, but the overwhelming response from missionaries and church leaders has been that this is something that has been needed for a long time, and there is a lot of excitement surrounding it right now.

I like to say that if I tried to predict what the Lord is going to do through MacTech, I would probably sell it short, because I believe that His plans are bigger than my vision. I hope and pray that this new ministry will engage young people in our churches to get involved in the ministry. Young people today are becoming graphic design artists, web designers, smart-phone app developers, and so on. Perhaps this will reveal something to them that they have never considered – that the same interests and talents and abilities that they have in their fields of study or in their careers can also be used for the Lord!

We look forward to meeting you in our travels. If your church would be interested in hearing more about MacTech, we would love to come and be a part of your services. If you would like to get involved with MacTech, let me know and I would love to discuss with you how you can help. We've already had a technology-based business owner in Texas donate a server to host these websites at no charge. Above all, we ask that you please add this ministry, and our family, to your prayer list.

God Bless,
Brandon Jones
