

MacTrips Director Gary Weidenbach

March 2017

Greetings,

Last year in California, because of the extended drought, they were talking, shorter showers, no watering your lawns, and only flushing your toilet once a day to save water. This year, it is a different story. We have had so much rain that water is flowing over the emergency spill ways at many of the area lakes, the local reservoirs are at capacity with the release gates running full and even downtown San Jose flooded this last week. If nothing else, it is interesting watching man trying to keep up with what the Lord does with the weather. But, praise the Lord for the much needed rain.

As of this writing, Pam is a quarter way through Radiation with minimal side-effects. March 28th will be the last day of Radiation. Please continue to pray for her as we are told that the Radiation side-effects typically show up on week 2 or 3.

This last month, I was able to go with the Mt. Hebron Baptist Church in Kentucky to Managua, Nicaragua for a one week medical campaign with Dr. Hugo from 01/28-02/04. There were 18 people on the team. While there we were able to conduct 4 days of clinic, saw about 600 patients and were blessed with 24 professions of Faith. We also met several of the local Baptist pastors and even had some of our meals catered by one of the church members who has a catering business there in town. It was a blessing being with the team during the week. Thanks to Chat Hester for putting the trip/team together.

See you on the field,

Gary Weidenbach
